## the space:

Humid, dark  
we have some neon lights that you can  
put everywhere. not so warm

It's possible to transform the space  
into a black box with blackout curtains  
and foam blocks.

It's possible to make holes in the walls,  
but the walls are humid. If you make  
holes in the white walls, please patch  
and paint them afterwards.

We have a dehumidifier running in the  
storage room!

When the cinema projections take place upstairs, it's not allowed to do be loud inside and outside the space. The sound travels very easily between the different floors of the building.
